

Primary 7 Transition Lesson

We know you're all excited to be starting High School in August! Your task is to create or plan a PowerPoint presentation all about High School.

We would like you to create a PowerPoint about your experience of High School lessons are so far.

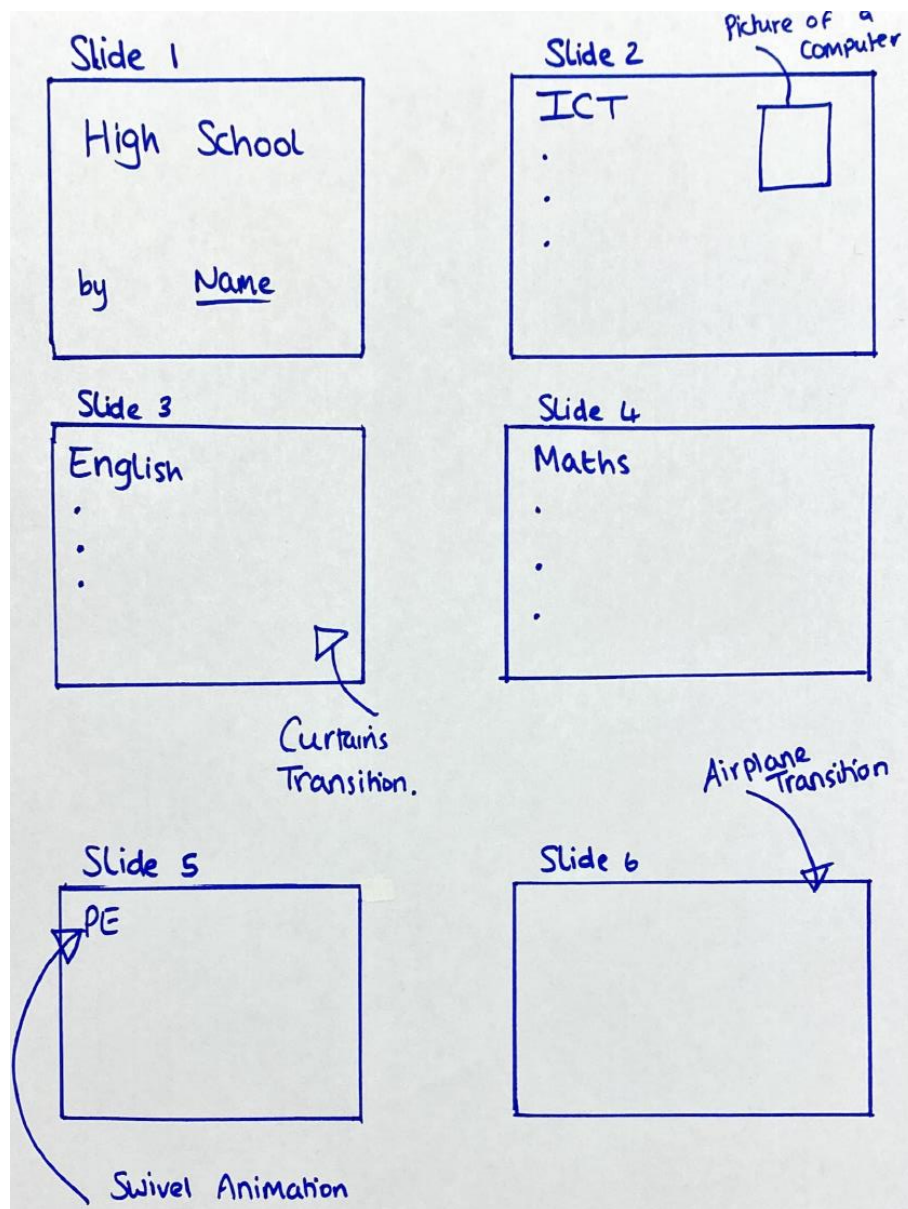

You might want to include these points on different slides:

- The subjects you have tried (one per slide). Include what you have learned.
- What do you know about high school already?
- What are you excited about the most?
- Is there anything you are worried about?

Don't have access to an iPad or computer?

Don't worry, you can make a plan for your PowerPoint if you can't create it. [Turn over for some examples...](#)

An example slide plan:

Remember to include:

- What will be on the slide
- A note of any pictures you want to include
- Any transitions between slides
- Any animations (e.g. as text and images appear).
